TO CATCH A COW

In groups of 4

Think of a way to catch a cow in Prehistorical time.

Either kill it for it's meat, or trap it for it's company or whatever you like.

1. Devise a tactic (how are you going to catch it)
2. What do you need (what materials)
3. How will you get those (find them, make them out of something, etc)

Beware of anachronisms! (remember 1.3)

You can use the sources in your book, or just your wits.

Write it down and speak english! You have 10 min. Good luck!
